Data				
	Treatment: Chinese and World Bank Aid Projects			
	Units of Observation: Communities			
	Substantive Outcome: Estimated Community Wealth			
	Image Confounders: Satelilite Imagery			
	Tabular Confounders			
		Nightlights (Pre-Project Wealth)		
		Population Density		
		Distance to Gold, Gems, Diamonds, and Petroleum		
		Travel Minutes to City of over 50k in 2000		
		Conflict Deaths		
		Birthpalce of Leader in Power		
		Nearby Chinese loan-based transport projects		
		Country-level GDP per capita		
		Country-level inequality		
		Country-level democracy score		
		Spacecraft		
Method				
	Identifying treatment and control groups and creating panel data			
	Image-based Confounding Analysis			
		Identification Strategy		
		Convolutional Neural Network		
		Randomized Embeddings
